

Individual Addendum Template
QM 2023 Capstone Project - Milestone 4
Individual Contribution Statement
Name: River Wullkotte
Team: First Row Team
Date: 5/1/26

1. Personal Contribution to Capstone Milestones

Milestone 1: Data Pipeline (Week 5)

Tasks completed:

- Helped import the project datasets
- Completed with the Data Quality Report

Hours spent: 6-8 hours

Key deliverable: Imported data and Data Quality Report support

Milestone 2: EDA Dashboard (Week 10)

Tasks completed:

- Created visualizations for the project
- Helped with the AI Audit

Hours spent: 5-6 hours

Key deliverable: Visualizations and AI Audit support

Milestone 3: Econometric Models (Week 14)

Tasks completed:

- Did initial data code input
- Converted the data to long format

Hours spent: 4-5 hours

Key deliverable: Initial data setup and long-format data structure

Milestone 4: Final Investment Memo (Week 14)

Tasks completed:

- Animated and formatted the presentation

Hours spent: 2-3 hours

Key deliverable: Presentation support

Total Estimated Contribution

Total hours across all milestones: 25 hours

Percentage of team workload: 25%

Role(s) on team: Data import and reporting support (M1), Visualization and AI Audit support (M2), Data formatting support (M3), Presentation support (M4)

2. One Defended Methodological Decision

Decision: I supported narrowing our analysis to the Florida data sources we could verify and use consistently, instead of trying to include every dataset we found.

Reasoning: We spent a lot of time sorting through possible sources and deciding which ones actually fit the project, especially when it came to whether we should focus only on Florida. Staying with the Florida-specific data made the analysis more consistent and gave us a cleaner comparison across the housing and hurricane datasets. It also reduced the risk of mixing in sources that did not line up well or were too difficult to match correctly.

Alternatively considered: We could have tried to include broader non-Florida data, but that would have made the project harder to organize and probably introduced more problems with source matching, consistency, and interpretation.

3. One Key Limitation of Our Analysis

Limitation: Our analysis may not fully capture every factor that affects housing prices.

Why this matters: Housing prices are influenced by many things besides hurricanes, including broader economic conditions and local market changes. That means some of the effects we saw could also be related to outside factors.

Potential mitigation: Future research could include more control variables or use a more detailed model to better isolate the hurricane effect.

4. AI Audit Notes (If Applicable)

AI Tools Used: GitHub Copilot

Specific AI Use Examples:

Example 1: Data Import Support

Prompt: Help me import this data

Output: AI generated code to help load the provided datasets into data frames/files for the project workflow.

Verification: I checked that the imported data matched the source data and that the file structure looked correct.

Critique: The AI was useful for setup, but I still had to check the file paths and make sure everything matched the project needs.

Example 2: AI Audit

Prompt: Help me format the AI Audit for M2

Output: AI helped organize the audit content into a clearer format.

Verification: I reviewed the final version to make sure it matched what we actually used in the project.

Critique: The AI helped with organization, but I still had to revise it so it fit our project and sounded natural.

Overall AI Use: I used AI for about 20–30% of my work, mainly for organization and writing support. All final decisions and interpretations were made by me.

5. Self-Reflection

What did I do particularly well on this capstone?

I did a good job helping with the data setup, making visualizations, and supporting the presentation. I also contributed to keeping the project organized through the data quality and AI audit work.

What could I have improved?

I could have started some of the documentation work earlier so I would not have been doing it close to the deadline.

What did I learn from this capstone project?

I learned how important data organization and visualization are before doing analysis. I also learned how to work as part of a team and help turn data into something that is easier to understand and present.

6. Attestation

By submitting this individual addendum, I affirm that:

All contributions listed above are accurate and honest

I have not exaggerated my role or minimized teammates' contributions

I understand that this addendum may be used to adjust my individual grade relative to the team grade

I take full responsibility for my work and any errors in the sections I authored
